

WHAT'S YOUR RISK OF TICK TRANSMITTED DISEASES?

FIND OUT!

THIS SUMMER WE CONTINUE WITH OUR RESEARCH ABOUT TICKS
AND THE RISK OF LYME DISEASE ON STATEN ISLAND

What do we do? We will visit your yard to evaluate your risk

The yard assessment includes:

- Looking for ticks in your yard
- Set-up "hair traps" and trail cams to identify which animals could be visiting your yard and bringing ticks with them.
- Conduct a survey to learn about your experiences with ticks
