*By Laura Wiess*

Available in paperback, hardcover and kindle editions from Amazon.com

With her father imprisoned, 15-year-old Meredith thinks she could live out her high-school days safely, but when he is released early for good behavior, her security is shattered. This is a gritty, terrifying novel about a father's abuse of power and trust, and the way two different teens, Meredith and her paraplegic friend, Andy, deal with that reality. Although not explicit, the novel is honest in its telling. Admittedly sensational, Wiess' story is a page-turner that ultimately sends a startling message of empowerment that, while improbable, is extremely satisfying. *Frances Bradburn*
